

World Cup Supply Street Gates

Looking for a new, fun approach to Dry-Land Training?

Street Gates from SPM are an innovative and safe way to keep kids "in the gates" during dry-land sessions.

Traditional Hero's (aka Stubbies) and 25mm, 67" hinged gates are attached to pavement of any type with 4, 1 1/4" dry wall screws that will not damage pavement.

PSIA and Rollerblade have teamed up to create off snow training and learning programs that are innovative, exciting and fun. Street gates from SPM can add a racing element to these programs.
